PROGRAM OVERVIEW

PURPOSE & HOW TO RUN IT

Two full-body sessions a week that make multi-sport athletes more powerful, more durable, and more available — without competing with their sport.

WEEKLY STRUCTURE

Day 1: Med ball power → Bench → Row → Posterior → Secondary press → Circuit. Day 2: Jump power → Front squat → Trap bar → Pull-Up Ladder → Single leg → Mobility circuit.

POWER FIRST, ALWAYS

Jumps and throws open every session, fresh, full rest, high intent. The variation rotates weekly so intent stays high.

PROGRESS ON PROOF

Add load only when all reps are clean and bar speed holds for two straight sessions — that rule governs main lifts and accessories alike.

ADAPT AFTER FATIGUE

Three true deloads (Weeks 7, 11, 15) where the bars actually come down — not just the circuits. No loading block exceeds four weeks.

WHY THESE MOVEMENTS

Bench for contact durability; front squat for posture and knee/hip mechanics; trap bar for athlete-friendly hinge strength; rows and pull-ups to protect shoulders; single-leg and Copenhagen work to keep hamstrings and groins available.

IN-SEASON RULES

Game week: cap every lift at RPE 7, drop the last set of B and C blocks, keep the jumps and throws. No lifting at RPE 7+ the day before competition. Availability beats load.

TEST WHAT WE TRAIN

KPI	PROTOCOL	TESTED
Vertical Jump	best of 3	Baseline · Weeks 7, 11, 15
Broad Jump	best of 3	Baseline · Weeks 7, 11, 15
Fly 10 (or Fly 20)	2 timed · best	Baseline · Weeks 7, 11, 15
Bench Press	3RM or clean heavy set	Baseline · Weeks 11, 15
Front Squat	3RM or clean heavy set	Baseline · Weeks 11, 15
Trap Bar Deadlift	weekly top set	Continuous
Attendance	%	Continuous — availability drives results

Standardization: same surface, same warm-up, same timing method, same number of attempts, every time.

OPTIONAL SPEED BLOCK · 10 MINUTES AFTER THE WARM-UP

DAY	PRESCRIPTION
Day 1	Acceleration: 4–6 x 10–15yd from varied starts · full walk-back rest
Day 2	Build-ups to fly: 2–3 x (20yd build + 10yd fly) · full rest · this trains the Fly 10 KPI

PULL-UP LADDER & FRONT RACK LEVELS

PULL-UP LADDER — EVERY ATHLETE HAS A LEVEL

LEVEL	STANDARD	PRESCRIPTION WHEREVER "PULL-UP LADDER" APPEARS
L0	0 pull-ups	Slow eccentrics 4-5s x5 + dead hang 20s
L1	1-3	Band-assisted x5 + 2 strict at the end of each set
L2	4-7	Strict sets of 5 · shorten rest week to week
L3	8-12	Strict 5s · add small load when all sets are clean
L4	13+	Weighted 4-5s · leave 1-2 in the tank

FRONT RACK LEVELS — NOBODY LOSES THE FRONT SQUAT TO WRIST MOBILITY

LEVEL	POSITION	GRADUATE WHEN
R1	Goblet / double-KB rack	Owens depth and posture
R2	Cross-arm barbell	Bar on shoulders, elbows up through full ROM
R3	Straps on the bar	Fingertips to bar, elbows above parallel
R4	Clean grip	Full position — stay here

Daily 2-minute front-rack micro-dose lives inside every warm-up: wrist rocks, banded lat stretch, elbow-punch hold with an empty bar.

POWER ROTATION — NO MOVEMENT REPEATS TWO WEEKS IN A ROW

SLOT	4-WEEK ROTATION
Day 1 • Med Ball	Chest Pass → Overhead Slam → Rotational Throw → Split-Stance Slam
Day 2 • Jump	Low Box Jump → Broad Jump → Hurdle Hop → Lateral Bound
